PROFESSIONAL SUMMARY

Highly analytical and detail-oriented Full-Stack Developer with a strong academic foundation in Computer Science and Software Innovation (GPAX 3.82). Proven capability in designing, developing, and deploying scalable web applications using React.js, Node.js, and ASP.NET Core MVC (C#). Adept at implementing hybrid database architectures, utilizing both SQL and NoSQL environments to optimize system performance. Combines technical coding expertise with practical experience in data verification, digital asset design, and retail logistics. Seeking to leverage robust software engineering skills in a professional Full-Stack or Backend Developer role.

TECHNICAL SKILLS

Languages: C#, JavaScript (ES6+), SQL (T-SQL, MySQL), HTML5, CSS3
Frameworks & Libraries: React.js, Node.js, Express.js, ASP.NET Core MVC
Databases: MS SQL Server, MySQL, NoSQL (MongoDB, Firebase)
Tools & Methodologies: Git/GitHub, RESTful APIs, OOP, MVC Architecture, Software Design Patterns

TECHNICAL PROJECTS

- Warehouse Management System (WMS)** **Full-Stack Developer**
- Co-developed a responsive web application designed for inventory tracking, real-time stock reporting, and data analysis.
 - Constructed scalable RESTful APIs utilizing Node.js and Express to seamlessly handle product metadata and stock adjustments.
 - Implemented optimized relational database schemas using MySQL to ensure strict data integrity across multiple storage locations.
- Badminton Court Booking & Management System** **Full-Stack Developer**
- Designed and engineered a comprehensive web application for court reservations and administrative facility management.
 - Developed core backend logic using ASP.NET Core MVC (C#) and structured robust data definitions in MS SQL Server.
 - Built secure user authentication workflows and interactive scheduling structures to eliminate double-booking conflicts.
- Sports Venue & Matchmaking Application** **Full-Stack Developer**
- Built a dynamic search and discovery web application designed to connect users with local sports fields and community matches.
 - Engineered a hybrid database architecture combining SQL and NoSQL configurations to achieve high-speed query performance and flexible metadata storage.
 - Developed an intuitive, real-time user browsing interface using React.js to enhance user engagement.

WORK EXPERIENCE

- Freelance 3D Template & Asset Designer** **May 2023 – Dec 2023**
Digital Content Creator *Remote (During Studies)*
- Designed and modeled 3D templates and custom pattern textures integrated into online gaming platforms.
 - Ensured asset optimization for seamless rendering and game-engine compatibility.
- Nitori Retail (Thailand)** **May 2025 – Jul 2025**
Part-Time Retail & Logistics Associate *Bangkok, Thailand*
- Managed inventory flow within the warehouse, ensuring organized stock distribution and precise product placement.
 - Delivered professional, high-standard customer service in a fast-paced retail environment.
- AIA Thailand** **2020 – 2021**
Data Entry Specialist *Bangkok, Thailand*
- Processed and verified high-volume insurance and corporate data into secure databases with meticulous accuracy.
 - Identified and corrected data inconsistencies, improving data entry workflow efficiency.

EDUCATION

- Sripatum University (SPU)** **Expected Graduation: 2027**
Bachelor of Science in Computer Science and Software Innovation *Current GPAX: 3.82*
Specialization: Software Full Stack Development (Day Program)
- Siam Technological College (Siamtech)** **Graduated: Mar 2023**
High Vocational Certificate (ปวส.) in Digital Graphics *GPAX: 3.72*

ADDITIONAL INFORMATION

Military Status: Exempted (ผ่านการตรวจเลือกทหารเรียบร้อยแล้ว)
Languages: Thai (Native), English (Technical / Working Proficiency)
